X-33 Linear Aerospike Engine undergoes first full-power test

The X-33 Linear Aerospike Engine was tested to full power for the first time Dec. 18 at Stennis Space Center in Mississippi. Initial test data indicates satisfactory engine performance throughout the 18-second test. The Marshall Center manages the X-33.

NASA Online Supply Catalog closed through Dec. 27. To order, call 544-9490

NASA Exchange, Bldg. 4752, will be closed Christmas

Volunteers needed for A&M youth motivational task force

Marshall's Equal Opportunity Office is looking for volunteers for a youth motivational task force at Alabama A&M University. Volunteers will spend two days on campus speaking to students and classes emphasizing skills necessary for making realistic career decisions. For more information, call Willie Love at 544-0088.

ODIN offers employees helpful Y2K advice

As a Year 2000 (Y2K) precaution, remember to shut down workstations before leaving for the New Year's holiday. For information technology assistance, call 544-HELP.

Next issue of 'Marshall Star' will be Jan. 6. Deadline for input is Jan. 3
